RAY 2021 – IDEOLOGIES

The fourth international Triennial of contemporary photography and related media in Frankfurt/Rhine-Main

The great promise of globalization - to bring more prosperity to people worldwide - is giving way to increasing scepticism. Human-made climate change, exploitation of nature, the power and dependence of societies on large tech corporations, and the steady accumulation of wealth in the hands of a few are leading not only to worldwide migration movements, but also to more and more frustration, resulting in an increasing polarization of public debates. Democratic structures are being called into question, and current models of autocratic governance in the East and the West are increasingly finding supporters. Flanked by targeted communication strategies, associated ideologies and ideological attitudes are disseminated as justification of ideas, convictions and values of a person, a group or state entities, whether through the spoken or written word, and even more so through images.

From **June 3 to September 12, 2021**, the international photography Triennial RAY will present contemporary photography and related media under the theme of **IDEOLOGIES**. Critically reflexive art, which questions its own foundations of creation and the very act of its presentation as well, will be presented. The association of the viewer with the artwork is determined by a disturbance, friction, exaggeration and by the production of something new, unsettling the manipulative fusion of the image with the viewer. The works challenge us to look at images critically, to analyze and understand them. Surrounded by an ever-increasing number of images, this ability is more important than ever. The **fourth edition of the RAY Triennial** will take place at **over 11 exhibition venues in the Frankfurt/Rhine-Main region.**
